---

Training Journey

- Joined as fresh college graduate.(2022 Passout)
- Underwent 6 weeks of technical training on Java

Project Journey
The project done so far……………….
Onboarding portal for MasterCard DXp

- Designed and developed a web application for MastercardDxp for user onboarding journey.
- Two models are there User and Admin.
- Admin can add the module,template and item to the onboarding portal and also can delete and edit all items.
- User will get all modules that admin has added to the portal and after that user can use and fulfill the functionalities of the items.

Employee Management system

- Designed and developed a desktop application for a Employee management system.
- Managed as Admin: add Employee details, delete Employee details, update Employee details and show Employee details.
- As User: View Employee details, view Benefit details.

#	Stack	Competency Level [Out of 10]	Remarks
